Bogor, West Java, Indonesia

Software Engineer / Backend Web Developer with professional experience developing and maintaining business applications using Go, PHP, Symfony, PostgreSQL, JavaScript, and modern web frameworks. Experienced in digitalizing business workflows, developing HR information systems, debugging production issues, and building maintainable backend solutions. Passionate about software architecture, AI-assisted development, and continuous learning.

Jenjang Pendidikan

IPB University - Bogor, Indonesia

Aug 2021 - Oct 2025

Bachelor of Applied Computer Science, 3.54/4.00

Pengalaman Kerja

Universitas Indonesia - Depok, Indonesia

Mar 2026 - Aug 2026

Kontrak/Web Programmer

Go • Gin • Nuxt • Vue • PHP 5.3 • Symfony 1 • PostgreSQL • JavaScript • Git

- Contributed to Iteration 2 of the Sistem Informasi Capaian Kinerja Pegawai (SICAKEP), developing and improving employee performance management features as part of the development team.
- Developed Iteration 2 of the Sistem Informasi Organization, Role, Business Process and Talent Analytic (ORBIT), including job analysis, workload analysis, monitoring, reporting, employee-data management, and organizational workflow features.
- Contributed to the initial development of the Sistem Informasi Career Opportunity System and Modern Core (COSMO), a recruitment management system built using Go, Gin, Nuxt, Vue, PostgreSQL, and REST APIs.
- Investigated and resolved production issues involving legacy code, session behavior, business rules, and anomalous production data across HR information systems.

Universitas Indonesia - Depok, Indonesia

Sep 2025 - Feb 2026

Magang/Web Programmer

PHP 5.3 • Symfony 1 • PostgreSQL 8.3 • JavaScript • Git

- Contributed to Iteration 1 of the Sistem Informasi Capaian Kinerja Pegawai (SICAKEP), an employee performance achievement information system, as part of the development team.
- Developed Iteration 1 of the Sistem Informasi Organization, Role, Business Process and Talent Analytic (ORBIT), including the initial workload-analysis questionnaire module using PHP 5.3, Symfony 1, PostgreSQL 8.3, and JavaScript.
- Developed and maintained employee-data and HR workflow features to support the digitalization of previously manual business processes.
- Performed testing, debugging, and iterative feature improvements based on internal requirements and user feedback.

PT Saraswanti Indo Genetech - Bogor, Indonesia

Jun 2024 - Feb 2025

Magang/IT Programmer

PHP • Laravel Lumen • Angular • MySQL • Git • Postman • Javascript

- Developed and maintained a cooperative management system using Angular 9, TypeScript, PHP, and Laravel Lumen 6.
- Developed and integrated REST API endpoints to support communication between frontend and backend services.
- Implemented dynamic PDF generation for application documents and reports.
- Configured and maintained the PHP 7.4 development environment for application development and testing.

Surfactant and Bioenergy Research Center (SBRC) - Bogor, Indonesia

Feb 2024 - Jun 2024

Magang/Web Developer

Laravel • MySQL • Bootstrap • Git

- Developed an inventory management system using Laravel, MySQL, Bootstrap, and Git to support inventory data management and operational workflows.

Keterampilan, Prestasi & pengalaman lain

- **Programming:** Go, PHP, JavaScript, TypeScript, SQL
- **Frameworks:** Gin, Symfony, Laravel, Lumen, Nuxt, Vue, Angular
- **Databases:** PostgreSQL, MySQL
- **Tools:** Git, Postman, ChatGPT, OpenAI Codex, Docker (Learning), Ollama

- **Concept:** REST API, MVC, RBAC, Repository Pattern, Clean Architecture, AI-Assisted Development
- **Language:** Indonesian (Native), English (Professional Working Proficiency), Sundanese (Native), Japanese — Beginner (Learning)
- **Interest:** Coding, Learning new programming language or framework, learning other capabilities and languages
- **DevKit Playground — Personal Project (2026):** Go, CLI, Developer Tools. Developed an offline-first developer toolbox providing deterministic utilities for common development tasks, including hashing, JWT and JSON inspection, environment comparison, repository and text inspection, port checking, timestamp conversion, and Base64 utilities. Designed reusable command logic with human-readable and structured JSON output for developers, programs, and future AI-agent integration. Implemented automated testing, CI, command contracts, versioned releases, and project documentation.
- **Local Agent Playground — Personal Project (2026):** Go, Ollama, SQLite, Local AI Agent. Developed an offline-first local coding agent using Ollama for local LLM inference. Implemented streaming chat, resumable SQLite sessions, auditable tool calls, workspace-restricted filesystem access, and explicit approval for file modifications and allowlisted development commands. Added safety controls including path validation, execution timeouts, step and output limits, and diff previews.
- **Go POS Playground — Personal Project (2026):** Go, Gin, Nuxt, PostgreSQL, REST API. Developed a full-stack POS application covering product, stock, transaction, debt, payment, and user-management workflows. Implemented RBAC, audit logs, pagination, filtering, sorting, soft deletion, and transaction integration tests. Managed iterative development, releases, documentation, and AI-assisted development with manual review and testing.
- **SICAKEP — Professional Project (2025):** PHP, Symfony, PostgreSQL, JavaScript. Contributed to Iterations 1 and 2 of Sistem Informasi Capaian Kinerja Pegawai (SICAKEP), an HR information system supporting employee performance achievement management. Developed and improved application features, supported workflow digitalization, and performed testing, debugging, and iterative improvements based on internal requirements.
- **ORBIT — Professional Project (2026):** PHP 5.3, Symfony 1, PostgreSQL 8.3, JavaScript. Developed Iterations 1 and 2 of Sistem Informasi Organisasi, Role, Business Process and Talent Analytic (ORBIT), supporting job analysis, workload analysis, employee data, monitoring, reporting, and organizational workflows. Maintained and enhanced the legacy application while resolving production issues involving business rules, sessions, and data.
- **COSMO — Professional Project (2026):** Go, Gin, Nuxt, Vue, PostgreSQL, REST API. Contributed to the initial development of Sistem Informasi Career Opportunity System and Modern Core (COSMO), a recruitment management system. Developed role-based recruitment and interview-management features, REST API endpoints, search and filtering, status workflows, and interview assessment interfaces.
