Bogor, West Java, Indonesia

Software Engineer / Web Developer with professional experience developing and maintaining business applications using Go, PHP, Symfony, PostgreSQL, JavaScript, and modern web frameworks. Experienced in information system development, business process digitalization, REST API integration, database management, and application troubleshooting. Interested in backend development, databases, software architecture, and continuous technology development.

Jenjang Pendidikan

IPB University - **Bogor, Indonesia** Aug 2021 - Aug 2025

Bachelor of Applied Computer Science, 3.54/4.00

Pengalaman Kerja

Universitas Indonesia - **Depok, Indonesia** Mar 2026 - Aug 2026

Kontrak/Web Programmer

Go • Gin • Nuxt • Vue • PHP 5.3 • Symfony 1 • PostgreSQL • JavaScript • Git

- Contributed to Iteration 2 of the Sistem Informasi Capaian Kinerja Pegawai (SICAKEP), including the development and improvement of employee performance management features as part of the development team.
- Developed Iteration 2 of the Sistem Informasi Organization, Role, Business Process and Talent Analytic (ORBIT), covering job analysis, workload analysis, monitoring, reporting, employee data management, and organizational workflows.
- Contributed to the initial development of the Sistem Informasi Career Opportunity System and Modern Core (COSMO), a recruitment management system built using Go, Gin, Nuxt, Vue, PostgreSQL, and REST APIs.
- Investigated and resolved issues in production systems involving legacy code, session handling, business rules, and data anomalies across HR information systems.

Universitas Indonesia - **Depok, Indonesia** Sep 2025 - Feb 2026

Magang/Web Programmer

PHP 5.3 • Symfony 1 • PostgreSQL 8.3 • JavaScript • Git

- Contributed to Iteration 1 of SICAKEP, an information system supporting employee performance achievement management, as part of the development team.
- Developed Iteration 1 of ORBIT, including the initial workload analysis questionnaire module using PHP 5.3, Symfony 1, PostgreSQL 8.3, and JavaScript.
- Developed and maintained employee data management and HR workflow features to support the digitalization of previously manual business processes.
- Performed testing, debugging, and iterative feature improvements based on internal requirements and user feedback.

PT Saraswanti Indo Genetech - **Bogor, Indonesia** Jun 2024 - Feb 2025

Magang/IT Programmer

PHP • Laravel Lumen • Angular • MySQL • Git • Postman • JavaScript

- Developed and maintained a cooperative management system using Angular 9, TypeScript, PHP, and Laravel Lumen 6.
- Developed and integrated REST APIs to support communication and data exchange between frontend and backend services.
- Implemented dynamic PDF generation for application documents and reports.
- Configured and maintained the PHP 7.4 development environment to support application development and testing.

Surfactant and Bioenergy Research Center (SBRC) - **Bogor, Indonesia** Feb 2024 - Jun 2024

Magang/Web Developer

Laravel • MySQL • Bootstrap • Git

- Developed a web-based inventory management system using Laravel, MySQL, Bootstrap, and Git to support inventory data management and operational workflows.

Keterampilan, Prestasi & pengalaman lain

- **Programming Languages**: Go, PHP, JavaScript, TypeScript, SQL
- **Frameworks**: Gin, Symfony, Laravel, Lumen, Nuxt, Vue, Angular
- **Databases**: PostgreSQL, MySQL
- **Tools**: Git, Postman, Docker (Learning), Ollama

- **Concept**: REST API, MVC, RBAC, Repository Pattern, Clean Architecture, AI-Assisted Development
- **Language**: Indonesian — Native; Sundanese — Native; English — Professional Working Proficiency; Japanese — Beginner (Learning)
- **BNSP Certification** (2025): BNSP Competency Certification — Software Engineer, LSP Vokasi IPB. Covers requirements analysis, software specification, software structure design, and user interface design.
- **Go POS Playground — Personal Project** (2026): Developed a full-stack Point of Sale (POS) application using Go, PostgreSQL, Nuxt, and Vue to manage sales, purchases, inventory, accounts receivable, payments, and operational reports. Implemented JWT and session-based authentication, RBAC, audit logging, atomic stock transactions, Excel import/export, PDF reporting, pagination, and idempotency mechanisms to prevent duplicate transactions.
- **ConvertBox - Personal Project** (2026): Developed a self-hosted file conversion service in Go for processing structured data, images, Office documents, and PDFs. Implemented an API-worker architecture using Redis queues and Docker, temporary file storage with automatic cleanup, MIME type and file signature validation, rate limiting, API key authentication, resource limits, and multiple security controls for processing untrusted files.
- **DevKit Playground — Personal Project** (2026): Developed a Go-based CLI developer toolbox providing utilities for inspecting files, repositories, text, JWTs, JSON, environments, ports, and timestamps, as well as hashing, Base64 operations, and secret and UUID generation. Designed reusable command logic with both human-readable and structured JSON output, automated testing, CI, command contract documentation, and versioned releases.
